

MODULE

MOD	COURSE PRESENTATION
	Start Here
1	Introduction to Machine Learning
2	Machine Learning Tools
3	Machine Learning Workflow & Types of Learning
4	Working with Data & EDA
5	Data Preparation & Feature Engineering
6	Regression and Classification
7	Evaluating Machine Learning Models
8	Overfitting, Underfitting, and Regularization
9	Decision Trees and Ensemble Methods
10	Unsupervised Learning Clustering & Dimensionality Reduction
11	Hyperparameter Tuning & AutoML
12	Ethics, Fairness, and Bias in ML
13	Building ML Pipelines
14	Real-World Applications & Workforce Skills
15	Project Workshop & Review
16	Final Exam or Project & Presentation
